What Is Footzonology

A technique that utilizes the signal system in our feet. It rejuvenates, balances, restores and detoxifies the mental, emotional, physical and spiritual body while assisting in the natural healing process. This unique method also includes a Foot-Zone analysis. Where you will learn what is affecting your body and what condition your health is in. Through this you will gain the knowledge to help you stay and become healthier. The improvements and benefits that Footzonology does for the body is more than amazing. A natural way to heal the body through the signal system in the feet, so that we may regain our optimal health from "heal to toe"!

What Are Your Feet Trying to Tell You

The feet are a reflection of the body. It reflects the past, present and possible future health concerns. When there is a tender or sore spot on the feet, that could be an indication that the signal is disturbed. Therefore, that part of our body is disturbed. Pain is our body's way of informing us that something's not right. We have been provided with a brilliant signal system through our feet! When we learn how this system works, we can see what is causing the pain and disturbances within our body. Through the correct use of this wonderful signal system, it can naturally be corrected and be brought back to balance with Footzonology.

How Does This Work

Every cell and organ of the body has a signal on the feet. We can access those organs and cells through the signal system in the feet to bring our body back to its true blueprint. Every cell in the body was programmed to regenerate. It holds the DNA memory. Which is why our cells are able to die off and keep regenerating. Through diet, stress, trauma; emotional/mental, environmental toxins, viruses, life style, we tend to change and mutate our cellular regeneration. Therefore having health issues and problems. Through this intricate technique our body and cells are reprogrammed to regenerate correctly. Therefore bringing the body back to its true blueprint. Everybody's body is different. Sometimes theres instant gratification! Sometimes its gradual, and you have to keep working at it. Keep in mind of how long it has taken your health to get to where it is now. If you want to have balance and want to be healthy, it takes effort and hard work on your part. What you do to and with your body, is up to you! The body was created and programmed to naturally regenerate itself to heal and to function properly. We just have to learn the correct "tools" and apply them so that it can!
